Visionstream awarded \$300m Telstra Services Contract

Specialist Communication Infrastructure Services company, Visionstream today secured a new two-year \$300 million contract to deliver access and associated services on behalf of Telstra.

Under the contract, Visionstream will construct and maintain both new and existing copper and Optic Fibre Access Networks.

In addition, Visionstream will provide onsite connection for Telstra customers including standard telephone, broadband and cable services.

Bob de Boer, Managing Director, Visionstream welcomed the opportunity to build on Visionstream's strong history of successful service delivery in partnership with Telstra.

"The award of the Access and Associated Services contract to Visionstream provides a doubling of the work volume that we currently provide to Telstra for these services."

"Through this newly awarded contract, and others such as our Wideband contract, Visionstream is proud to be a major service partner to Telstra delivering services to Australians on a truly national basis."

Visionstream, part of the Leighton Contractors Group, is a specialist Communication Infrastructure Services company that provides Design, Construction Commissioning and ongoing Network Maintenance Services to the Telecommunications Industry.
